## WORK SPOTLIGHT

### Moisture Intrusion Solutions

[www.moisturesolutions.net](http://www.moisturesolutions.net)

2016, 2017, 2018 - Contractor

MIS contracted with me three times over the last few years to create a custom CMS log-in system for their employees and clients, create a drop-box type file sharing module, symposium registration module, and a bulk emailing form creation system so that they could be free of third party marketing apps.

PHP MVC / Javascript / Smarty Template / JQuery / Ajax / JSON / Bootstrap / InDesign PDF Manuals

### Donasity, Inc.

[www.donasity.com](http://www.donasity.com)

July 2015 to Sept 2016 - Employee

An offshore team created donasity.com, and I was hired to take over all custom development and fix modules that needed better UI or more features. I also developed events management, event ticket sales, state public giving programs, and a "Donate Now" button paid membership module for Non Profits.

PHP MVC / Javascript / Smarty Template / JQuery / Ajax / JSON / Bootstrap / InDesign PDF Manuals

### Premiers Promotions & Imports / On Demand Promo Division

[www.odpromo.com](http://www.odpromo.com)

July 2011 to Dec 2014 - Employee

PPI began a partnership with Office Depot in 2011 and hired me to create and support about 50 corporate stores for Office Depot's larger corporate clients. Each store allowed for extensive feature customization even though they all worked from a macro site that loaded all products. The macro control site handled store creation, corporate logo uploads, product, and user management. Each store began as a standard template, and could launch in 20 minutes. All stores were allowed to have custom code, and from regional logo constraints, and various shipping location customizations based on corporate requirements, and different billing needs, most stores were highly customized. Corporate clients included- Physiotherapy, McLaren, JenCare, ChenMed and other health related giants, several universities, sports teams, and also included various Corporate Thank You Gift Programs.

ColdFusion / Javascript / JQuery / Ajax / SQL / HTML / XML / CSS / JSON / Adobe Captivate video trainings / InDesign PDF Manuals

### Florida Virtual School

[www.flvs.net](http://www.flvs.net)

2011 - Employee

FLVS is the largest on-line free education site in the country. I was hired along with about a dozen other programmers to help migrate all of their on-line coursework to Blackboard, a CMS for schools. They were ecstatic with my work. They kept me to the last moment, after all other temporary hires had gone.

### IPO Boutique

[www.ipoboutique.com](http://www.ipoboutique.com)

2011 - Contractor

Scott Sweet, an IPO Advisor who has been on just about every financial news outlet, hired me to overhaul the back end of his site so that all of his site content - from IPO web page data, reports, and report data geared for membership-only emails, could be generated by one database in a custom office log-in system. Now, his office personnel can log in and with a few clicks add and generate all data.

PHP / MySQL / Ajax / Javascript / JQuery / HTML / CSS

### Vincent Martella & Captain Tony's Pizza

[www.vincentmartella.com](http://www.vincentmartella.com) [www.captaintonys.com](http://www.captaintonys.com)

2010 - Contractor

An award winning movie actor and voice over actor for the Phineas and Ferb cartoon, and his father who owns a pizza franchise, contracted me to create both of their sites.

PHP / MySQL / Flash / Javascript / HTML / CSS

### Healing Hearts International

[www.healinghearts.org](http://www.healinghearts.org)

2005-2010 - Employee

A four level membership type system for counselors and their on-line clients. On-line Bible studies, training, walkathon registration system, custom forum, e-card system, donations, and e-commerce.

PHP / MySQL / Flash / Javascript / HTML / CSS

### Premier School Agendas

<http://premier.us/>

2000-2005 - Employee

A million dollar company that prints custom agendas for schools across the nation. I created a training site to train and test college student summer hires on how to handle customer-supplied artwork.

PHP / MySQL / HTML / CSS
