WORK HISTORY

Moisture Intrusion Solutions

www.moisturesolutions.net

Sept 2016 - Mar 2017 - Temp Full Time Employee

MIS hired me to create a log-in system for their employees and clients, so that files could be shared via a custom drop-box type project tracking module. Office admins use this log-in system to manage the site.

PHP MVC / Javascript / Smarty Template / JQuery / Ajax / JSON / Bootstrap / InDesign PDF Manuals

Donasity, Inc.

www.donasity.com

July 2015 to Sept 2016 - Employee

My role at donasity was to manage site content, handle all new development including adding events management, event ticket sales, state-wide public giving programs, and also overhaul major modules where the owners were not happy with the quality of work from the previous offshore development team, such as log-in, fundraiser creation, CMS, and multiple language handling.

PHP MVC / Javascript / Smarty Template / JQuery / Ajax / JSON / Bootstrap / InDesign PDF Manuals

Premiers Promotions & Imports / On Demand Promo Division

www.odpromo.com

July 2011 to Dec 2014 - Employee

PPI began a partnership with Office Depot in 2011 and hired me to create and support about 50 corporate stores for Office Depot's larger corporate clients. Each store allowed corporate logos to be applied to various products. An extensive back end multi-admin-level control site handled store creation, corporate logo uploads, product and user management. Each store began as a custom template created by myself, and was able to handle log-ins in as little as 20 minutes. Each store was allowed to have custom shipping grids, regional logo constraints and many other core code customizations. I tracked all store versions and managed updates myself. Corporate clients included- Physiotherapy, McLaren, JenCare, ChenMed and other health related giants, several universities, sports teams, and also included various Corporate Thank You Gift Programs.

ColdFusion / Javascript / JQuery / Ajax / SQL / HTML / XML / CSS / JSON / Adobe Captivate video trainings / InDesign PDF Manuals

Florida Virtual School

www.flvs.net

2011 - Employee

FLVS is the largest on-line free education site in the country. I was hired along with about a dozen other programmers to help migrate all of their on-line coursework to Blackboard, a CMS for schools. They were ecstatic with my work. They kept me to the last moment, after all other temporary hires had gone.

IPO Boutique

www.ipoboutique.com

2011 - Contractor

Scott Sweet, an IPO Advisor who has been on just about every financial news outlet, hired me to overhaul the back end of his site so that all of his site content - from IPO web page data, reports, and report data geared for membership-only emails, could be generated by one database in a custom office log-in system. Now, his office personnel can log in and with a few clicks add and generate all data.

PHP / MySQL / Ajax / Javascript / JQuery / HTML / CSS

Vincent Martella & Captain Tony's Pizza

www.vincentmartella.com www.captaintonys.com

2010 - Contractor

An award winning movie actor and voice over actor for the Phineas and Ferb cartoon, and his father who owns a pizza franchise, contracted me to create both of their sites.

PHP / MySQL / Flash / Javascript / HTML / CSS

Healing Hearts International

www.healinghearts.org

2005-2010 - Employee

A four level membership type system for counselors and their on-line clients. On-line studies, training, walkathon registration system, custom forum, e-card system, donations, and e-commerce.

PHP / MySQL / Flash / Javascript / HTML / CSS

Premier School Agendas

<http://premier.us/>

2000-2005 - Employee

A million dollar company that prints custom agendas for schools across the nation. I created a training site to train and test college student summer hires on how to handle customer-supplied artwork.
